Undergraduate Laboratory Assistant Required

The Schonbrunn laboratory, located in the Stabile Research Building on the Moffitt Cancer Center campus, is interested in recruiting an Undergraduate Lab assistant. The laboratory’s research is founded on drug discovery, focusing on molecular biology, protein purification, and protein crystallography.

The incumbent undergraduate lab assistant responsibilities would entail:
• Preparation of standard laboratory stock solutions, e.g. buffers, reagents, etc.
• Assisting scientists in ongoing research projects.
• Basic laboratory up-keep.

The Position:
• Approx 10 hours per week that can be tailored around your class schedule.
• On-the-job training provided; prior laboratory experience is not required.
• Position is paid on an hourly basis.
• Provides laboratory experience, which may be an asset on your CV or resumé.

The Ideal Candidate:
• Must be a freshman or sophomore interested in pursuing a career in science or medicine.
• Must be enthusiastic, with the ability to communicate, work well with others, follow directions, and manage multiple tasks simultaneously.

If you are interested or have questions regarding the position please contact Mathew Martin at 813-745-8297 or email mathew.martin@moffitt.org
