Spring 2014

Advanced Marine Biology

BSC 4313C; 4 Credits
Lecture 9-11am on Tuesday
Lab/field trips noon-4pm on Friday

This course will adopt a problem-based pedagogy: students will take the lead on answering questions about local marine ecosystems. Specific topics that may be covered include:

• Research methods in marine ecology
• Mangrove ecosystems
• Seagrass ecosystems

• Invasive species
• Beach Ecology
