PCB 4522C
Experimental Genetics & Cell Biology

This hands on laboratory intensive course offers instruction to undergraduate students on advanced laboratory techniques pertaining to genetics, cellular, & molecular biology, including:

- An introduction to *C. elegans* biology
- Molecular cloning & protein detection
- RNAi & fluorescent microscopy

Instructors:
Beth Jones-Mason, Ph.D.
Robert Hill, MS

3 Credit Hours
**Lab:** Mon & Wed 1:30-4:15*
**Lec:** Wed 12:30-1:20*
*Location is ISA3015

Contact robert108@usf.edu for questions and permits.
Permit requires that students must have **completed** PCB3023L and/or PCB3063L
